

CCNA Discovery: Working at a Small-to-Medium Business or ISP

During the Cisco Networking Academy® course, administered by the undersigned instructor, the student was able to proficiently:

- Describe the structure of the Internet and how communication occurs between hosts
- Install, configure, and troubleshoot Cisco® IOS devices for Internet and server connectivity
- Plan a basic wired infrastructure to support network traffic
- Configure a server to share resources and provide common Web services
- Implement basic WAN connectivity using Telco services
- Demonstrate proper disaster recovery procedures and perform server backups
- Monitor network performance and isolate failures
- Troubleshoot problems using an organized, layered procedure
- Describe the OSI model and the process of encapsulation

Dear Maximilian Bachhuber

Congratulations on completing the **CCNA Discovery: Networking for Home and Small Businesses** course as part of the Cisco Networking Academy. This hands-on, lab-oriented course has prepared you for exciting career opportunities in the technology industry.

By completing this course you have earned a Certificate of Completion for CCNA Discovery: Networking for Home and Small Businesses, and acquired competencies that include the following:

- Setting up a personal computer system, including the operating system, interface cards and peripheral devices
- Planning and installing a small network connecting to the Internet
- Troubleshooting network and internet connectivity
- Sharing resources such as files and printers among multiple computers
- Configuring basic IP services through a GUI

Technological literacy is more important today than ever before, and Cisco is proud to provide you with the knowledge and skills necessary to build and maintain computers.

Please accept my best wishes for your continued success.

Sincerely,

A handwritten signature in cursive script that reads "John Chambers".

John T. Chambers
Chairman and Chief Executive Officer
